AFFIDAVIT FOR SEARCH WARRANT

I, Kelly E. Cain, being duly sworn hereby depose and state:

1. I am a United States Postal Inspector currently assigned to the San Diego Field Office of the Postal Inspection and my duties include investigating violations of the Drug Abuse Prevention and Control Act.
2. This affidavit is submitted in support of an application for a search warrant for the following Priority Mail Parcel:
 - a) Priority Mail Parcel addressed to "K&G Trucking 3653 Flakes Mill Rd. Suite F-113 Decatur, GA 30034". The parcel has the return address information of "Gifts By Trish 4765 Home Ave. Suite #G San Diego, CA 92105".
3. I have been employed as a Postal Inspector since August 2006. From August 2006 through October 2006, I attended the Basic Postal Inspector Academy. Starting October 2006, I was assigned to the Prohibited Mailings Illegal Narcotics Team. Previous to that, I was employed with the San Diego County Sheriff's Department for approximately three and one-half years and with the San Diego State University Police Department for approximately six years. During that time, I was involved in several narcotics related investigations. I received training from the California Department of Justice Advanced Training Center on Drug Identification & Influence, the California Narcotic Officers Association on Drug Abuse Recognition, the Drug Enforcement Administration on Basic Narcotic Investigations and the U.S. Postal Inspection Service which included instruction regarding individuals using the U.S. Mails to transport controlled substances and

proceeds from the sale of controlled substances as well as the use of Postal Money

Orders to launder the proceeds of controlled substances transactions.

4. Based upon my training, experience and discussions with other Postal Inspectors and agents I know the following in summary:
 - a. Individuals who regularly handle controlled substances leave the scent of controlled substances on the currency and other items they handle. Proceeds from these sales are often stored in close proximity to the controlled substances, thereby transferring the odor of the controlled substance to the monies and packaging materials. Narcotic canines are trained to alert on the scents of controlled substances.
 - b. The Postal Inspection Service and DEA Narcotic Task Force Commercial Interdiction Team have worked aggressively to limit the use of shipping companies and the U.S. Mail for the transportation of controlled substance through these companies.
 - c. Ongoing investigations have disclosed that Priority/overnight and "two day" parcel deliveries have become a method of choice by drug dealers for the transportation of contraband or the proceeds of narcotic sales.
 - d. I know that Southern California is a source region for controlled substances being mailed throughout the United States. The proceeds from these narcotic transactions are then transported via the U.S. Mails and other communication facilities back to Southern California, the source of the controlled substances.

e. Drug dealers prefer the U.S. Mail, (but will sometimes utilize commercial shipping companies), specifically "Express Mail" or "Priority Mail," for the narcotic or narcotic proceeds transportation for various reasons, some of which are listed below:

1. Items sent via "Express Mail" or "Priority Mail" are considered to be first-class mail, therefore, cannot be examined without a Federal Search Warrant.
2. "Express Mail" is usually requested to be delivered by the next day's mail.
3. "Priority Mail" is usually requested to be delivered within two days of mailing.
4. Dispatch times for "Express Mail" are specific and are controllable by the mailer/shipper.
5. Any delay to the mail is an indication to the mailer the mail items have been possibly compromised by law enforcement agencies to obtain a search warrant.
6. While it is not always the case that a delay of "Express Mail" or "Priority Mail" is for law enforcement purposes, those involved in illegal transactions have found that the odds are against delays in deliveries of "Express Mail" or "Priority Mail" by United States Postal Service.
7. "Express Mail" and Priority Mail" may weigh up to 70 pounds and is desired for large volume shipments.

- f. Businesses are more likely to use Express Mail and Priority Mail than First-class Mail in the course of normal business and will often use an Express Mail Corporate Account Number for the billing of the mailed articles.
- g. Criminals who are involved in trafficking of controlled substances and drug proceeds will often receive multiple Express Mail articles within a short time period of each other.
- h. Criminals who are involved in trafficking of controlled substances and drug proceeds will often use multiple Post Office Boxes, Commercial Receiving Agencies and addresses in foreign countries to conceal their true identities and place of residence.
- i. I also know that drug related parcels containing currency, checks or money orders sometimes do not contain the presence of controlled substances because persons involved in shipping often utilize packing methods and sanitation procedures to conceal the odor of controlled substances.
- j. I also know from talking to U.S. Postal Service Supervisors and employees responsible for handling the mail that Express Mail is insured for up to \$100 in case of loss or damage. Insurance for Priority Mail may be purchased at an additional fee. Customers are discouraged from sending U.S. currency via the U.S. Mails and are encouraged to purchase negotiable instruments as a means to send currency by the U.S. Postal Service.

5. The information in this affidavit is based upon information I have gained from my investigation, my personal observations, my training and experience as well as information related to me by other Postal Inspectors and law enforcement officers. Since this affidavit is being submitted for the limited purpose of securing a search warrant, I have not included each and every fact known to me concerning this investigation.

6. On 05-19-08, I was conducting a routine interdiction at the Midway Processing & Distribution Facility in San Diego, CA. I came in contact with a Priority Mail Parcel. The parcel was addressed to "K&G Trucking 3653 Flakes Mill Rd. Suite F-113 Decatur, GA 30034". The parcel has the return address information of "Gifts By Trish 4765 Home Ave. Suite #G San Diego, CA 92105". I became suspicious of the subject parcel for the following reasons: The size, shape and appearance of the parcel was consistent with parcels previously identified in other investigations that contained controlled substances. I took custody of the subject parcel for further investigation. I searched an address database system for the return address of 4765 Home Ave. Suite #G San Diego, CA 92105. The address was found to be an invalid address. I later contacted the City Heights Post Office who handles deliveries for the 92105 zip code. I spoke with an employee at the City Heights Post Office who confirmed the return address was an invalid address. I searched an address database system for the recipient address of 3653 Flakes Mill Rd. Suite F-113 Decatur, GA 30034. No records were found for this address. I later contacted the Wesley Chapel Post Office in Decatur, GA, who handles deliveries to 3653 Flakes Mill Road, Decatur, GA. I spoke with an employee at the Wesley Chapel Post Office, who told me the address on Flakes Mill Rd. was a Mail Boxes, Etc., and the letter carrier who delivers to that address was already out on his route, therefore, it could not be confirmed if there was a Suite F-113 located at 3653 Flakes Mill Rd., Decatur, GA.

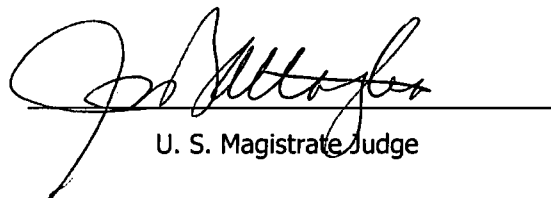

7. On 05-20-08, I met with San Diego Police Department Detective Dan Billberry and his trained narcotic detection canine Cajun, at the Midway Processing & Distribution Facility. Detective Billberry and Cajun conducted an exterior examination of the subject Priority Mail Parcel. When Cajun examined the parcel described above, Detective Billberry told me that Cajun had alerted to the presence of the odor of controlled substances. I then secured the subject parcel pending an application for a search warrant. The qualifications of canine Cajun are contained in Attachment A.
8. Based on the facts set forth in this affidavit, I submit that there is probable cause to believe controlled substances, notes and/or currency from the illegal sale and mailing of controlled substances is being concealed in the Express Mail parcel as described above and seek the issuance of a search warrant directing the search of the article as described above and the seizure of the article, any controlled substances, currency, and/or materials and documents reflecting the distribution of controlled substances, all in violation of Title 21, United States Code, Sections 841(a)(1), 843(b), and 846.

Kelly E. Cain
Postal Inspector

Sworn to before me, and subscribed in my presence, on this

21st Day of May, 2008.

U. S. Magistrate Judge

ATTACHMENT A
For
Daniel M. Billberry and K-9 Cajun

Daniel M. Billberry is currently a detective for the San Diego Police Department (SDPD) assigned to the San Diego Integrated Narcotic Task Force (NTF) and deputized as a Federal Officer. Det. Billberry has been a police officer for over 20 years and has worked as a narcotic detection dog handler since June 2005. Det. Billberry is a member of the California Narcotic Canine Association and the California Narcotics Officers Association.

Detective Billberry has participated in over 200 arrests of persons for violations of controlled substance laws. Det. Billberry has in excess of 250 hours of formal training and extensive experience in controlled substances investigations, particularly involving marijuana, methamphetamine, heroin, and cocaine, including the 80 hour DEA Narcotic Investigator Course, the 40 hour DEA Clandestine Laboratory Investigator Course, the 40 hour Drug Trafficker Interdiction Characteristics Course, the 40 hour DEA Operation Jetway Investigator Course and the 40 hour SkyNarc Criminal Interdiction Course. Det. Billberry has testified as an expert in the field of narcotics in state court. Det. Billberry is familiar with the manner in which said substances are packaged, marketed and consumed. Detective Billberry has received formal training and field experience in the identification of all types of controlled substances, particularly those mentioned above, by sight and odor. Detective Billberry has worked in an undercover capacity in purchasing controlled substances.

From May 1999 to June 2005, Det. Billberry was assigned to the Narcotic Street Team. Det. Billberry was involved in over 200 cases either as the case agent or assisting detective. Detective Billberry has observed hundreds of persons involved in narcotic trafficking and has developed an expertise in observing certain characteristics, of which one or more are commonly evident in the majority of narcotic smuggling cases.

On June 4, 2005, Detective Billberry was assigned to the NTF Commercial Interdiction Team. Det. Billberry has been involved in over 100 parcel cases where he utilized surveillance techniques, profiles of persons and parcels and his narcotic detection canine. Det. Billberry has observed several hundred parcels during the course of his duties. On selected parcels, Det. Billberry has observed certain characteristics that although not illegal, when taken in their totality lead him to believe the parcel contains controlled substances. These include illegible or non-existent return addresses, misspelled street names, handwritten labels, taped in an unusual manner, strong masking odors emitting from the parcel and/or cash payment.

Det. Billberry has been able to confirm his suspicions by utilizing a narcotic detection canine to alert to packages. It has come to Det. Billberry's attention during recent inspections of parcels containing controlled substances discovered during routine audits by United Parcel Service and Federal Express security that the smugglers are utilizing extreme measures to shield the odor of the controlled substances from the canine.

In November 2007, Detective Billberry was assigned to train K9 "Cajun" in the area of narcotic detection. Detective Billberry and "Cajun" received approximately 20 hours of training and evaluation in the detection of marijuana, heroin, methamphetamine and cocaine from SDPD narcotic canine trainer Steve Sloan. Steve Sloan is a certifying official for the California Narcotic Canine Association. Prior to Det. Billberry being assigned "Cajun", "Cajun" was originally trained and certified by a United States Border Patrol designated trainer as a narcotic detection canine where he was deployed with a Border Patrol Canine handler for approximately one year. "Cajun" was donated to the San Diego Police Department in November 2007, after his handler was promoted. "Cajun" was assigned to work with San Diego Police Detective, Daniel Billberry on this date.

On December 20, 2007, "Cajun" was certified as 100% proficient in the detection of Heroin, Cocaine, Marijuana and Methamphetamine by Steve Sloan who is a certifying official for the California Narcotic Canine Association.

Cajun's alert consists of physical and mental reactions, which include a heightened emotional state, and coming to a complete "sit" when his physical position allows.

Detective Billberry and "Cajun" have been involved in training exercises where known controlled substances, containers, or paraphernalia were hidden. Because of the absorption of the odor, and the narcotics detection dog's inherently keen sense of smell, the narcotic detection dog will continue to alert on the container or item depending on the length of exposure to the controlled substance, the specific controlled

substance, and ventilation of the item or container. The common belief is all currency in circulation is contaminated with narcotics. It has been the experience of Detective Billberry, a properly trained narcotic detection canine will not alert to all currency. Det. Billberry has witnessed searches of parcels by trained narcotic detection canines where no alert was given. The parcels later were discovered to contain substantial sums of U.S. Currency.

It has been Detective Det. Billberry's experience; the training of the canine regarding threshold amounts of narcotic odors is the most relevant factor regarding alerts on currency. It has been Det. Billberry's experience the training must include the establishment of a lower threshold of approximately one gram of odor or more to ensure the canine is alerting to more than average contamination. Average contamination is reported to occur through normal handling. The canine must also be "proofed" from numerous odors including currency on a regular basis to maintain consistency. These have included food, plastic bags and wrap, tape, controlled substance adulterants, circulated US Currency, and other items. Proofing is a method used in training to ensure the canine alerts only to the odors for which it is trained to alert.
